6th to 12th March, 2016

LEARNING ABOUT SCHOOLS & EDUCATION SYSTEM

- I became acquainted with the development of educational systems in Spain
- Czech Republic is the most similar system LOE 2006
- Unlike the Spanish system in the Czech Republic we have vocational schools within secondary schools (15-19) in addition to grammar schools
- Very interesting is the system of schools – PUBLIC, PRIVATE, SEMIPUBLIC and funding

LEARNING ABOUT THE CULTURE

- A great experience for me - to establish education of young generation about the cultural and historical traditions
(I myself usually start each new topic in physics teaching with historical context)
- Mixing cultures (Roman, Arab, Christian, Jewish) certainly have a positive effect for tolerance (?)
- I love Spanish culture and references to it

LEARNING ABOUT SCHOOLS & EDUCATION SYSTEM, DISSEMINATION OF LEARNING

- Practical application: Teaching handout for your students
 - ✓ for school students will be organized presentation
 - about my study visit in Spain
 - about study visit of the group of our teachers in Estonia
 - ✓ for school students will be held screenings of some Spanish film in Spanish with English subtitles. Discussion about the topics of the film will follow the screening

LEARNING ABOUT SCHOOLS & EDUCATION SYSTEM, DISSEMINATION OF LEARNING

- Practical application: Process of teaching & learning
 - ✓ Based on experience from study visit to accentuate further the idea of open school
 - the school as a visible part of your region
 - school, which is a certainty for their students, teachers and partners
 - ✓ Acquaint teachers with the possibility of using tablets in the classroom, in subjects where appropriate

No stress, do not panic ... relax (but after hard work with people)
